## CONGRATULATIONS ON PURCHASING A SPG43 SLIDE

The Grey Ghost Precision SPG43 is the first truly aftermarket slide to hit the market for the G43. We started with a billet of American made 17-4PH stainless steel and machined the slide to our own specifications. Critical tolerances are held within 0.003" for improved accuracy and performance without compromising the reliability and function that GLOCK® pistols are known for. The slides are then finished with Diamond-Like Coating (DLC) for outstanding corrosion resistance and low-friction properties. The SPG43 comes in two distinct patterns:

**V1** has uniquely designed angled serrations in the front and rear for improved slide manipulation.

**V2** has raised diamond checkering in front and rear for more aggressive grip texture.

## << ASSEMBLY AND INSTALLATION >>

### **ASSEMBLY AND INSTALLATION INSTRUCTIONS**

You will need to field strip your Glock® in order to install this slide. For instructions on disassembly, see your Glock® Owners Manual.

**BEFORE FIELD STRIPPING YOUR GLOCK®, ENSURE THE MAGAZINE IS REMOVED AND THE CHAMBER IS UNLOADED. VISUALLY VERIFY THE CHAMBER IS EMPTY!**

**To assemble a stripped slide, you will need the following parts (not included)**

- Firing Pin & Spring
- Spring Cups
- Safety Plunger & Spring
- Complete Extractor with LCI
- Extractor Depressor Plunger Assembly
- Slide Cover Plate
- Recoil Spring and Guide Rod Assembly
- Front and Rear Sights
- Barrel

**NOTE: A CHANNEL LINER IS NOT NEEDED IN THE GLOCK® G43 SLIDE**

## << ASSEMBLY AND INSTALLATION >>

1. With spring inserted into safety plunger, install into hole in underside of SPG43 slide ensuring notch is facing away from extractor. Depress plunger making sure it moves up and down unimpeded in it's pocket.
2. While depressing plunger, insert extractor into the slot with claw facing chamber. Release plunger and verify extractor is now secured into place.
3. Install Firing Pin Assembly into large channel in back of slide, with firing pin facing out toward chamber.
4. Install Extractor Depressor Plunger Assembly into smaller channel in rear of slide.
5. Install backplate by depressing the Firing Pin Assembly's spacer sleeve with a tool while sliding backplate into rear groove, until backplate overcomes the sleeve.
6. Depress Extractor Depressor Plunger Assembly with tool while pushing backplate into position. It will make a positive "snap" sound when installation is complete.
7. Install barrel and recoil spring assembly into the SPG43 slide. Barrel should drop in freely. Reassemble SPG43 slide onto your pistol frame, and verify operation by cycling slide and dry fire testing WITH AN UNLOADED CHAMBER.

## **<< IMPORTANT SAFETY INFORMATION >>**

**CAREFULLY READ THIS INSTRUCTION MANUAL  
PRIOR TO INSTALLING THIS SLIDE AND FIRING YOUR PISTOL.**

If unfamiliar with firearms, seek further advice through safe handling courses run by your local gun clubs, NRA approved instructor, or similar qualified organizations.

**CARELESS HANDLING COULD RESULT IN PROPERTY DAMAGE, INJURY  
OR DEATH. ALWAYS TREAT ANY FIREARM AS IF IT IS LOADED.**

Use only clean, dry, high quality commercially manufactured ammunition in good condition which is appropriate to the caliber of your chosen firearm. We do not recommend the use of remanufactured or hand loaded ammunition because it may damage your firearm. Use of improper ammunition will invalidate your warranty.

**ALWAYS KEEP THE GUN POINTED IN A SAFE DIRECTION  
NEVER LOAD THE GUN UNTIL READY TO USE  
KEEP YOUR FINGER OFF THE TRIGGER UNTIL READY TO SHOOT.**
